Relevant Coursework: Data Structures, Software Engineering, Web Programming, Data Visualization, Web Design, Graphic Design, Immersive Design
Spoken Languages: English, Filipino

EXPERIENCE

Creighton4Good Open-Source Software Lab – Omaha, NE (Remote) February 2026 to August 2026
Software Development Intern (30 hours/week)

- Designed and deployed a containerized Spring Boot backend to AWS ECS Fargate (RDS MySQL, S3, ALB, ECR, IAM, CloudWatch), standing up the team's first shared staging environment.
- Diagnosed a load balancer health-check misconfiguration that was silently failing every deployment, reasoning from rollout behavior back to threshold timing against application startup.
- Debugged and fixed OAuth 2.0 redirect URI generation behind a reverse proxy, unblocking Microsoft Entra single sign-on on web and mobile after months of being blocked.
- Migrated photo storage from ephemeral container disk to Amazon S3 with a scoped IAM task role, preserving existing API contracts so no frontend changes were required.
- Reviewed backend and frontend pull requests to catch authorization gaps and cross-platform inconsistencies before production, and authored deployment documentation with a handoff session for the remaining developer.

GRO – Evansville, IN (Remote) June 2026 to August 2026
Web Design Intern (20 hours/week)

- Built custom, responsive WordPress pages from Figma mockups using Elementor Pro and Bricks Builder, with pixel-accurate UI implementation across desktop, tablet, and mobile.
- Applied SEO and performance best practices, including semantic heading hierarchy, image optimization, metadata, and Core Web Vitals, while building to accessibility and usability standards.
- Collaborated with UX/UI designers on design handoff, performed QA testing for responsiveness and cross-device consistency, and troubleshooted and resolved layout and Elementor issues efficiently.

HDR, Inc. – Omaha, NE May 2025 to January 2026
Corporate Marketing Services Intern (40 hours/week)

- Created the Environmental Science and Planning onboarding document and designed assets for HDR's monthly internal events across cross-sector services.
- Produced graphics, digital assets, and award submittals, and edited Arizona office headshots in Adobe InDesign, Photoshop, and Illustrator, aligned with HDR's global brand standards.
- Edited engineering project feature videos, wrote internal articles, and maintained SharePoint pages while supporting HDR Foundation initiatives with multidisciplinary teams.

BrookHaven Tax & Accounting Professionals – Hartwell, GA (Remote) July 2025 to December 2025
Data Analytics & Design Assistant (15 hours/week)

- Built Excel automation tools, including VBA macros and formula-driven dashboards, and integrated them with brand-compliant document templates to streamline recurring client reporting.
- Designed brand-compliant graphics for client presentations, tax-season marketing materials, and internal communications using Adobe Creative Suite.
- Reported directly to the CEO, translating complex financial data into accessible dashboards and visual summaries for small-business clients and non-technical stakeholders.

Creighton iJay Store (Apple Authorized Campus Store) – Omaha, NE January 2025 to May 2025
Web Developer (10 hours/week)

- Led the design and development of the iJay Alumni page in Shopify, a responsive landing experience to engage Creighton alumni with the campus Apple store.
- Built and maintained responsive web pages using HTML, CSS, JavaScript, Java, and Python as the lead developer on a two-person team.
- Conducted code reviews and tested across Chrome, Safari, Firefox, and mobile devices to ensure cross-browser compatibility and performance.
